

Attorney Docket No. Q64200
PATENT APPLICATION

AMENDMENT UNDER 37 C.F.R. § 1.111
U.S. Appln. No. 09/830,772

AMENDMENTS TO THE SPECIFICATION

Please delete the present Abstract of Disclosure and replace it with the following

new Abstract of Disclosure:

The invention relates to an asynchronous transfer ~~mode~~ method of transmitting digital signals in which terminals (16, 18) send to the same station (20). Calls are transmitted by cells (40, 42, 44, 46), the terminals send successively in separate periods (60, 62, ~~4664~~, 66; 70, 72, 74), and each cell is assigned at least two orthogonal codes (C1, C2, C3, C4). In accordance with the invention, the duration of the period during which each terminal sends and/or the number of codes assigned to each terminal and/or the number of symbols assigned to a particular code in a terminal can be selected on each sending as a function of a particular power level (80).
